

# INSTALLATION OF THE CAPSULE ADAPTOR ON CLUB PU/S AND CLUB ME MACHINES

Laranzato Club Machines (one group, pour-over or automatic) come with a factory supplied Single and Double Portafilters. A capsule adaptor (U.S. Patent Pending) is available and requires minor assembly. We suggest that you make the single Portafilter your new Capsule Portafilter.

**To convert the machine to use Capsules, please follow these 3 easy steps**

- 1- Using a flat head short screwdriver, unscrew the bolt (fig. 1) that holds the coffee screen under the group head. The screen and the diffuser (fig. 2) will both come off. Save the screen, diffuser and the bolt for future use.

- 2- The capsule adaptor is supplied with a new kind of diffuser that has holes drilled in its top and a new machine screw (fig. 3). Using a Phillips head short screwdriver, attach new diffuser into the group head (fig. 4). Do not re-attach screen since it is not necessary for use with a capsule.

- 3- Remove from your Portafilter (fig.5) the coffee basket and the spring (fig. 6). Put in your capsule insert and re-insert the spring so the insert is permanently secured inside the Portafilter (fig. 7). You can start enjoying your espresso or tea capsules immediately.
